#### **DETAILED ACTION**

### Priority

1. This application appears to be a division of Application No. 10/300,782, filed 11/21/03.

## Information Disclosure Statement

2. The Information disclosure Statement filed on 7/23/03 has been considered.

## Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

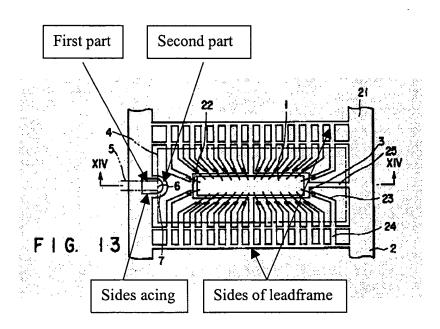

A person shall be entitled to a patent unless –

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

  (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 4. Claims 4-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Nakazawa et al (5,684,327).

The figures and reference numbers referred to in this office action are used merely to indicate an example of a specific teaching and are not to be taken as limiting.

Regarding claims 9, 12, and 14, Nakazawa et al (see specifically figures 13-14 attached below and Col. 8, lines 55+) disclose a lead frame for the semiconductor device comprising:

a first region (4) in which a semiconductor chip (1) can be encapsulated with resin, and a second region in which an opening (6) is formed, the opening having one end, which extends to the first region, and another end opposite to the one end being rounded (see figure 13). Nakazawa et al. further disclose the opening (6) including a first part being rectangularily shaped (e.g., the left side portion) and a second part being semicircularily shaped (e.g., the right side portion), and the sides acing to each other of the first part are parallel to sides of the lead frame, wherein the first part is used for passing resin material, and the second part is used for storing resin material.

Application/Control Number: 10/624,635 Page 4

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Luan Thai whose telephone number is 571-272-1935. The

examiner can normally be reached on 6:45 AM - 4:15 PM, Monday to Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Tokar can be reached on 571-272-1812. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
